GOTHAM STIRRED  
BY A TRAGEDY

NEW YORK, Nov. 18.—No tragedy has so stirred base Gotham in months as the mysterious death of Walter Farnsworth Baker, the wealthy Bostonian, apparently from poison, at the home of his friends, Frank and Mrs. Hurd, at Bogota, New Jersey.

Baker's death at his death dinner at a chop house. At 11:30 Harry Lee called at the Nottingham hotel for Frank Hurd, his wife and Mrs. Geo. W. Young, Mrs. Hurd's sister, wife of the vice president of the Windsor Trust company. Lee told them Baker was ill. The party went to the chop house, took Baker in an automobile to Hurd's residence at Bogota, where the young man expired.

News of the death was kept quiet and within an hour the body was embalmed. It was buried after a physician had given heart disease as the cause of death.

Then came the discovery that Baker left a will, leaving \$2000 to Mrs. Young, \$10,000 to Mrs. Hurd, a like amount to his brother, E. F. Baker of Boston, and \$1,000,000 to Natalie Hurd, said to be the 4-year-old daughter of Mrs. Hurd.

This will, found in Boston, was drawn last February, and is said to have aroused suspicion that it was written while Baker was not himself mentally.

The fact that the Bostonian was the ardent admirer of Mrs. Young, an intimate friend of the Hurds, and was a tenderloin roisterer and spendthrift, has become public property since the tragedy, chiefly through the charges made by Edward Baker that his brother had been murdered as a result of a plot to obtain possession of his fortune.

Where Baker was poisoned, who poisoned him, and why did he leave such a sum to Natalie Hurd is what the police and Pinkertons are asking.

**STOCK ISSUE INCREASED.**  
BOSTON, Nov. 18.—The stockholders of the Boston Consolidated company have voted to increase the stock by 100,000 shares, which will be held against the issue of convertible debenture bonds voted by the directors. Only \$252,000 of these bonds will be issued for the present, and 84,000 shares of the new stock deposited in the treasury against them for conversion. The debentures will be issued in denominations of \$1, \$5 and \$10, and offered pro rata to stockholders.

Twenty-five dollars is yours if we do not stop falling out of hair or fail to cure dandruff by the use of Ess-Tee-Dee. The Mizpah barber shop.

PLANT FOR THE  
CONGRESS MINE

J. R. Wood, president of the Del Oro Mining company, operating at Johnnie, is making arrangements for the installation of a 15-horsepower gasoline hoisting plant at the property.

Mr. Wood has just returned from the mine, where he found development work progressing very satisfactorily. The shaft was just recently started, and when it reaches a depth of fifty feet the hoisting machinery will be installed. This, he thinks, will be in about ten days.

The bottom now shows two and a half feet of ore, which, he says, will average better than \$400 to the ton in gold. Mr. Wood has specimens from the Del Oro which run into the pictures. The quartz is studded with free gold, and carries values into the thousands.

Mr. Wood brings the information that a \$75,000 mining plant is to be erected at once on the Congress, which adjoins his property. The Congress is owned by Harry Ramsey, Jim Butler and associates. It is an old mine, having been operated years ago, and has a shaft on it 500 feet deep, besides a great deal of lateral work. Generally speaking it is a low grade proposition with a vein measuring forty feet in width. There is a high grade, streak however, which returns values as high as \$200 in gold. A mill formerly operated was burned seventeen years ago, and practically nothing has been done on this property since this time. The present owners intend starting work on the new plant the first of the year.

The new mill will probably handle some custom ores, which Mr. Wood thinks will greatly facilitate the development of the Del Oro, since the initial output can be treated there before the company is ready to install its own machinery.—Bullfrog Miner.

LOTS OF WORK  
IN THE UBEHEBE

Thomas H. Murphy returned this week from the Ubehebe district, where he has extensive mining interests. Mr. Murphy was formerly associated with W. E. Ewing, J. O. Tompkins and T. F. Helse in the ownership of the Fortuna group of claims recently sold to the Salsberry interests.

He says that the shaft on the Fortuna is down twenty-five feet and that gold values of \$50 and copper of 16 per cent have been uncovered. Surface yields as high as \$12 in gold have been obtained.

On the B. and B. group, owned by L. P. McGarry, J. W. Ball and H. W. Elchbaum, the crosscut tunnel is in 170 feet, and it is expected to reach the vein within the next few feet.

The Uilda people are working a good force of men doing assessment work, and a Goldfield crowd working between the Uilda and the Busch property are getting good results. Mr. Busch's Red Rose is also making an encouraging showing.

Mr. Murphy says that there is a great deal of work going on all over the district.

On his return he stopped at "Scot's" camp, and the Death Valley mystery sent word to McDonald and McPherson, who had entered attachment proceedings against him to recover a debt claimed for boarding a couple of mules, that they may keep all the mules for the bill, since he has all the horses and mules he needs at present.—Bullfrog Miner.

Do you know that Pinesalve Carbolic acts like a poultice in drawing out inflammation and poison? It is antiseptic. For cuts, burns, eczema, cracked hands it is immediate relief. Sold by Tonopah Drug Co.

**HIS HELPMATE.**  
"Yes, Hussy certainly is successful in business and his wife is largely responsible for it."  
"You don't say? I didn't think she was the helpful sort."  
"Well, you see, she made it absolutely necessary for him to earn more money."

**TWO AUTOCRATS.**  
Redd—Did you ever stop to think how much an automobile is like a wife?  
Greene—Expensive to keep, do you mean?  
Redd—Yes; but a fellow never can tell whether he's going to be able to manage one until he owns one.—Exchange.

GIBSON'S RE-TRIAL  
HAS BEEN FIXED

GOLDFIELD, Nov. 18.—Judge Langan Saturday afternoon fixed November 25 at 10 a. m. as the time for the beginning of the second trial of George Gibson on a charge of murdering Richard Maunsell. Notice was given that the court and the clerk of the court at 5 o'clock Saturday—It appearing that there are not enough names in the panel to complete a jury in the case—would draw 175 names from the jury box and that a venire, holding the same, would be issued to Sheriff Ingalls, returnable on November 23.

A strong effort was made by the defense to have the second trial become a part of the proceedings of the next term of court, but without avail. The Gibson trial will be the last criminal case to be heard before Judge Langan prior to his departure from Goldfield to reside in other sections of his district.

CRUCERO SMELTER  
WILL BE BUILT

It is asserted by parties who are supposed to be on the inside and closely connected with the project, that the much talked of Crucero smelter will surely be built.

The importance of this smelter and the great benefit to be derived by Crackerjack and surrounding camps cannot be too highly stated. It will mean that the vast amount of medium and low grade ores now in sight in the different mines in Crackerjack will be reduced at a good profit to the owners. It also will be the means of effecting a great saving in shipment charges on the high-grade ores that are now going to the Salt Lake valley smelters from the Bonanza mine and leases, and this ore will undoubtedly be treated at the Crucero plant.

The survey for the smelter's site has already been completed and it is expected that the work of breaking the ground will be under way within ninety days at the outside. The company has control of 300 acres with ample switching privileges on the two railroads, the officials of the latter having expressed themselves as being highly elated over the prospects which the new smelter will open up. When it is known that within a radius of fifty miles of the smelter approximately 500 tons of ore are shipped daily to the Salt Lake smelters, it can also be readily understood that the new undertaking is looked upon with great favor by the mining men of that territory. Their favorable opinion is greatly enhanced by the fact that the freight rates on their ores to this smelter are exceedingly low and will enable them to effect a great saving in their smelter account.

The smelter when completed will consist of two 100-ton lead stacks and one 100-ton copper stack. Auxiliary to this will be a Lowe system coke plant, for which the complete rights for San Bernardino county have been secured by the company. This plant will supply about twenty-five tons of the best grade of metallurgical coke which will increase the capacity of the smelter to approximately 500 tons daily, and will also furnish power sufficient to operate a 3500-horsepower electric lighting plant, which in itself will be of no small benefit to the mines of that region. In addition to all of this there will be a residue of distillate in the form of gasoline sufficient for the needs of all the camps of the desert.

The company intends to build up a custom business and expects within a year to increase their capacity to 1000 tons per day, but at the present time they own lead-gold properties in the Shadow mountains, twelve miles east of Silver Lake, which alone will produce enough ore to supply one quarter of the entire initial capacity of the smelter, and at the same time furnish flux for the custom ores treated. The company also owns a number of copper properties in the New York mountains as well as extensive lime and iron deposits on the railroad near the smelter.—Crackerjack News.

It is a well known fact that persons living in the Pine forests do not suffer from kidney diseases. One dose of Pinesalve at night usually relieves backache. 30 days' treatment \$1.00. Your money refunded if not satisfied. Sold by Tonopah Drug Co.

For Rent. "For Rent Furnished" and "For Sale" cards on sale at the Bonanza office.
